

Target

Project: Target Site

Engineer: Michael Baker Jr. Inc.

Location: North Hills, PA

THIS PROJECT RECEIVED THE 2006 OUTSTANDING DEVELOPER AWARD

Shannon Construction worked closely with the Michael Baker Corporation (Baker), JJ Gumberg Co. and Targets' general contractor to prepare the site for the new retail store.

We were responsible for the demolition of the existing structures on the site of the development area. Shannon Construction managed all of the site excavation, grading, drainage, foundation and slab on grade.

We arranged all temporary utility accounts to be opened for usage during construction and for Target to assume after the project was completed.

The final phase of construction included installation of concrete sidewalks, curbs, asphalt paving, and landscaping.
