

SAFETY STARTS WITH US.

At Shannon Construction, safety is how we work. We plan ahead, look out for each other, and speak up when something's not right. That mindset drives how we operate every day. These are the core practices that keep our people and our jobs safe:

ESTABLISHED OBJECTIVES & PRACTICES

We set clear goals and regularly review them to keep getting better. Written safety plans as required by project.

STATE-CERTIFIED SAFETY COMMITTEE

We work together—management and field—to identify issues, stay compliant, and keep our sites safe.

ON-SITE SAFETY COORDINATORS

Dedicated safety leads are on-site daily to support crews, run inspections, and make sure safety stays a top priority.

DRUG-FREE WORKPLACE

We expect everyone on our sites to be fit for duty. Safety starts with being clear, focused, and ready to work.

EMPLOYEE SAFETY TRAINING

From CPR to Fit Tests, we conduct weekly training to stay sharp, safe, and ready. It's all about knowing what to do before something happens.

CLEAN & SAFE WORK ENVIRONMENT

A clean site is a safe site. We keep things organized to avoid hazards and work smarter.

RECOGNITION FOR SAFETY EXCELLENCE

We use Whistle Rewards to give real-time shoutouts with incentives for safe choices on the job.

ACCOUNTABILITY FOR SAFE PRACTICES

We hold our team and our partners to high standards. Failure to follow safe practices results in immediate corrective action.
